

ARBITRUM • UNISWAP V3

SPLC USDC

SPLC / USDC Liquidity Pool

Seed Round — Bootstrapping the AMM venue on Arbitrum One

GOAL
\$20,000 USDC

12-MONTH LP TIME-LOCK FULL-RANGE V3 POSITION ON-CHAIN VERIFIABLE

SPIRALCOIN.NET

SPONSOR PACK • SEED ROUND

\$20,000 to bootstrap the SPLC / USDC AMM on Arbitrum One

One transparent, on-chain sponsor pool. Uniswap V3 (1% fee tier, full-range). LP NFT time-locked for a minimum of 12 months. Every dollar verifiable on Arbiscan from the moment it lands.

ARBITRUM ONE

UNISWAP V3 • 1%

FULL-RANGE LP

12-MONTH TIME-LOCK

USDC-PAIRED

FUNDING GOAL

\$20,000 USDC

Bootstraps a tradeable SPLC/USDC venue on Arbitrum One — the on-ramp for every downstream listing.

LP TIME-LOCK

12 months min

LP NFT transferred to SPLCLPlock immediately after seeding. Principal cannot be withdrawn during the lock window.

VENUE

Uniswap V3

VERIFIABILITY

100% on-chain

1% fee tier (10,000 bps), full-range concentrated position. Native USDC. Tax-inactive on the V3 pool to preserve K-invariant.

Pool address, LP NFT, lock contract, and seeded amounts are all queryable on Arbiscan within minutes of deployment.

Where the \$20,000 goes

ALLOCATION	PURPOSE	USDC
USDC pool side	Paired into the SPLC/USDC V3 pool (full-range LP).	\$19,000
Gas + deployment	Pool create, mint, lock-transfer, oracle init, multi-chain peer setup.	\$600
Listing & data fees	DEXScreener Enhanced Token Info, GeckoTerminal trust badge, metadata hosting.	\$400
Total		\$20,000

How it deploys (3 transparent steps)

STEP 1 · T+0

USDC received in treasury

Sponsor contribution sent to the multisig treasury address. Receipt published with the on-chain transaction hash.

STEP 2 · T+24H

Pool seeded + LP locked

SPLC + USDC paired in Uniswap V3 (1% tier, full-range). LP NFT transferred to `SPLCLPlock` with a 12-month minimum unlock timestamp.

STEP 3 · T+72H

Listings live

GeckoTerminal + DEXScreener auto-index the new pool. CoinGecko/CoinMarketCap submissions filed once the pool meets their volume thresholds.

What the sponsor gets

- **On-chain attribution** — sponsor wallet recognized in `contracts/deployments/arbitrum/LpAndLock.json` alongside the pool address and lock contract.
- **Site recognition** — sponsor logo or wallet badge on spiralcoin.net/splc under "Seed-round contributors" (opt-in; anonymous accepted).
- **Cover graphic credit** — name listed on the published cover graphic on social and listing pages (opt-in).
- **Direct reporting** — weekly email with pool TVL, volume, and fee accrual figures pulled directly from on-chain data.
- **First look at follow-on rounds** — preferential access to the next funding round (no obligation to participate).

Risk disclosure. SPLC is a volatile, speculative digital asset. Token prices can and do go to zero. The 12-month LP time-lock prevents removal of seeded liquidity but does not guarantee price stability, secondary trading volume, or return of capital. Sponsor contributions are not investments, equity, or revenue-share entitlements — they are donations toward bootstrapping public on-chain infrastructure, with the recognition benefits described above. Trading involves risk. Past performance does not guarantee future results. Verify all on-chain references directly via Arbiscan before contributing.
